Urban and Rural

Commentary on Diocese of Winchester – Parish Share Rural and non-Rural 2009-10 Worksheet

The worksheet analyses the parish share asked of mainland parishes of the Diocese in 2009 by estimated population in 2010, within three categories: Rural - Village; Rural - Town; Urban.

The statistics behind the analysis come from Hampshire County Council and Winchester Diocesan web sources. While the Diocese of Winchester does not include the east of the County, it does include some of eastern Dorset. The definition of rural is that set by the government in 2004, settlements with under 10,000 population. I have introduced a notional subdivision of rural into towns (settlements over 4,000 population) and villages (settlements of less than 4,000) – arbitrary, but it fits with experience.

While the county and diocese are not coterminous, the results show clearly that the rural church is **very seriously subsidising** the urban church in the mainland Winchester Diocese, and in the northern area **grossly subsidising it**. This fact is not widely acknowledged nor celebrated.

Perhaps the diocese needs to do much more work on discerning how its rural and urban areas relate beyond this narrow measure, and accept the fact that it is a significantly rural diocese heavily dependent upon the parish share generated in its rural parishes.

1. Worksheet 1: Parish Share 2009 - Rural Village & Town and Non-Rural

- a. This lists parishes by deanery, giving the parish share allocation for 2009.
- b. The parish share is then divided between Rural and Urban: the population listing defining rural and urban is that in Worksheet 2: Hampshire Parish Populations 2010 and Worksheet 3 Hampshire Ward Populations 2010.
- c. The green area at the bottom summarises the totals compared with percentages of area and population of the County of Hampshire (different from the Diocese of Winchester).
- d. Hampshire is 23% rural by population, while rural parishes are asked for 48.1% of parish share (villages 33.2% and towns 14.9%).
- e. The rural parishes of the northern archdeaconry are allocated a parish share of 64.9% of that of the whole of their area.
- f. The southern archdeaconry has a much lower proportion paid by villages and towns: it is a more urban area.
- g. Overall, villages pay 33.2% and towns 14.9% of Winchester Diocesan parish share.

2. Worksheet 2: HCC Parish Populations 2010 [available on request]

- a. This shows the parishes and non-parished areas of Hampshire ranked in deceasing population size, with the major division into rural and urban by the 2004 classification, and then the rough division of rural into town and village (below the 4000 mark).
- b. This information was used to categorise the parish listings in Worksheet 1.

3. Worksheet 3: HCC Ward Populations 2010 [available on request]

a. This information was used for fine tuning some of the parish information for Worksheet 1.

4. Worksheet 4: HCC Rural and non-Rural [available on request]

- a. This shows projections for growth over a five year period to 2013, allocated between a finer subdivision of the rural constituency.
- b. The map of Hampshire shows the 2004 Rural / Urban classification of parishes in the county.
